

Acquia Cloud

Opening the Door to China

Extend your digital experiences into China with Acquia's China Managed Services.

China is one of the largest economic markets in the world and being able to operate your digital presence from within the Great Firewall is guaranteed to have beneficial impacts on your business.

However, many businesses often face barriers to entry that keep them from pursuing the advantages lying in wait within China. These barriers can come in the form of:

- Strict government oversight
- Complicated network architecture
- Lack of technical and regulatory knowledge
- And more

Ultimately, these can lead to slow time to market, high maintenance costs, operational inefficiency, and delivery risk if not managed and planned for correctly.

Luckily, with China Managed Services, our team of Drupal experts is able to help explain and guide you through the hurdles required to operate on your Drupal-optimized, private cloud within the Great Firewall.

Increase performance by up an average of 220% with Acquia's China Managed Services.

ACQUIA
EXPERIENCE DIGITAL FREEDOM

Acquia is able to provide you this service in conjunction with our partner, CI&T:

- AWS China private cloud provided by CI&T, managed by Acquia.
- Support provided by CI&T through Zendesk, on top of TAM Drupal expertise.
- Operating in China under regulatory compliance standards.

A Fully Managed Service

Acquia China Managed Services provides the personnel and expertise that you need to run your Drupal web experiences within China. With this service, we take responsibility of the maintenance and management so you can spend more time on your content and digital strategy. Additionally, we offer an expansive scope of services, continuous roadmap improvements, best-in-class expertise, and 24/7 critical support. In addition, you will receive:

- Development, Staging, and Production Environments
- Solr Search Service
- Multi-AZ w/ Disaster Recovery
- VCS deployment workflows
- SSH Shell Developer Access

Compliance Readiness Engagement

Start your journey with a 4-12 week pre-license engagement to guide you through understanding, navigating, and meeting the compliance requirements of hosting within China.

Expert Support and Guidance

Our Technical Account Managers are trained to act as trusted advisors for our customers' digital initiatives in China. As new laws and regulations continue to be introduced, our China-trained TAMs will be able to relay how these might impact your business and assist in maneuvering the evolving landscape. Benefits to having an Acquia TAM include:

- Localised to you
- Success focused
- Business aware
- China managed service liaison
- Technical navigator & manager
- Help mitigate risk
