

## Configure and launch communities with ease

Acquia Commons is the open social business software that has everything you want – collaboration, community, and more – at a surprisingly low cost of ownership.

The Acquia Commons Jumpstart helps you efficiently plot the best course for your online community. Our deeply experienced architects help you minimize the time and cost of establishing your community through intelligent planning, training in best practices, and a proven approach. As the creators of Acquia Commons, nobody knows it better: Leverage our expertise to ensure a successful move to Acquia Commons.

### Get the big picture.

The Acquia Commons Jumpstart is typically executed over 1 week and can be extended based on a series of add-on services tailored to assist with more advanced community requirements.

Acquia executes the Jumpstart in partnership with the site's owners and development team. Specific assessment activities include:

- **Success metrics and requirements review.** Review of business objectives and success metrics behind the desire to create a Commons community.
- **Installation of Acquia Commons.** Analysis of your desired site architecture, and installation and basic configuration of Acquia Commons based on core features such as groups, reputation, notifications, blogs, forums, events and calendars, and status updates.
- **Basic training.** How to administer and extend your Acquia Commons community site.
- **Rollout planning and summary of best practices.** Summarization of findings from the Jumpstart, providing technical recommendations for your community's official rollout.
- **Acquia Commons Jumpstart report.** Following the completion of the workshop, a written report that outlines our recommendations for your specific community on Acquia Commons. The report includes a summary of our work together and recommendations for next steps to complete the rollout.

### WHO BENEFITS

- Organizations planning to build a new community, or migrate an existing one to Acquia Commons.
- Internal teams, consultants, and agencies seeking the fastest path to deployment of a community solution.
- Business owners looking to identify the most effective, risk-free, and cost-effective strategy to deploy a community.

# Acquia Commons Jumpstart

## Move forward.

Acquia's Commons Jumpstart gives you all you need to:

- **Get there faster.** Eliminate guesswork in setting up your community. Learn how to manage your solution from the team that built Acquia Commons. You'll see the results of your investment in a matter of days!
- **Incorporate best practices.** The Acquia Commons Jumpstart provides an independent assessment of your site's development and deployment approach, with specific recommendations on Commons best practices. By implementing best practices early, your internal group benefits from the experience and insight of our seasoned team.
- **Reduce the cost of deployment.** Planning your community site with Acquia reduces the cost and complexity of achieving your goals. Our deeply experienced approach to community planning helps you work through architectural and project execution decisions in a way that will save you effort in the long term. Our recommendations are all prioritized against site requirements, potential impact, and budgetary constraints.

## Start now.

Nobody knows Acquia Commons better than Acquia. The world's leading experts are at our disposal: Shouldn't they be at yours? Call 888.9ACQUIA or visit [acquia.com](http://acquia.com) to get started now.

## WHAT'S A JUMPSTART?

Acquia's Jumpstart programs are fixed-price consulting engagements from Acquia Professional Services, working side-by-side with your team to provide mentoring and development. We help you define your technology strategy, architect a scalable and secure solution, and learn how to use Drupal to achieve your goals.
