

## Figma to Source step by step instructions

1. Go into Terminal, and run our simple installer.
2. Type: `curl -fsSL https://canvas.drupalstarforge.ai/install.sh | bash`
3. Hit Enter and follow the steps!
4. The wizard will guide you through all the steps to set up and connect to Acquia Source.
5. Log in when the installer prompts you to start a clean setup, or use a DDEV environment if you prefer.
6. Call the migration skill in Claude Code by typing “/migrate-site” and pointing to the url of your figma file in the browser.
